connection) and terminal "S" (Yellow/Light Blue wire). See Fig. 3. Engage starter motor and verify noise is coming from starter motor. If noise is coming from starter motor, go to next step.

1999 Ford Expedition Truck Will Not Start ,just Click Click

CASE 1: The starter motor cranked the engine.This means that the starter motor is good and that you have an electrical issue keeping the starter motor from cranking the engine. The next step is to go to TEST 2 and see if the starter motor solenoid is getting the Start Signal on the S terminal wire (circuit).

Part 1 -How to Test the Starter Motor (Ford 4.6L, 5.4L)

Big trips in your Expedition require a lot of planning and logistics, so the less mechanics you have to worry about, the better. A Ford Expedition starter gets your vehicle going and consists of important components like a safety switch, battery cables and an ignition switch. A good starter routinely rotates your engine between 85 and 150 RPMs.

Expedition Starters - Best Starter for Ford Expedition ...

If the solenoid relay is clicking, usually that is a sign the battery is weak. When you jumped the solenoid did the engine crank as it suppose to, just not start? Or did it crank slowly? If slowly, again, it could be a weak battery. By cranking, I mean the engine turns via the starter. Is the solenoid relay new?

Ford F-150 Questions - My Truck doesn't start, no crank ...

Still just a loud click when I turned the key to start. So I replaced the firewall starter relay and that was working fine. So finally after all of that I pulled a used starter off a 2000 Ford Expedition, put it in my truck and it started twice just fine. I cleaned up the ground to the bell housing where the starter sits as well.
