Paraguay and Uruguay agreed to work together towards better conservation of migratory species of grassland birds of Southern South America and developed the MOU text.

Southern South American Grassland Birds | CMS

Birds of prey, also called raptors, are widespread across North America. There are many types of birds of prey commonly found in the South, including hawks, falcons, vultures, and owls. They can be identified by their sharp beaks and talons; they also have incredible eyesight, which allows them to see across great distances and identify prey on the ground far below them as they soar through ...
