Php: The Complete Reference by Steven Holzner

In PHP programming, any operation performed on a class object such as assign, return or pass, etc; the operation always is carried out with reference to the object instead of its copy. The standard syntax to create PHP object reference is followed as below:

```
class  
ClassName {//Body of the class}  
$classObj1 = new ClassName ();  
$classObj2= $classObj1;
```
