The Wormsloe Historic Site, informally known as Wormsloe Plantation, is a state historic site near Savannah, Georgia, in the southeastern United States.The site consists of 822 acres (3.33 km 2) protecting part of what was once the Wormsloe Plantation, a large estate established by one of Georgia's colonial founders, Noble Jones (c. 1700-1775). The site includes a picturesque 1.5 miles (2.4 km ...

### Wormsloe Historic Site - Wikipedia

Crabgrass is a grassy weed with blue-green leaves that form a crab-like circle. Though it doesn't usually become noticeable until the summer, crabgrass germinates in the spring, typically in thin or bare areas of a lawn, or in dry soil. An annual weed, crabgrass will die with the first hard frost in the fall. Treat it.

There are dozens of different lawn weeds, but the greatest problems are caused by a select few. While it is tempting to simply use heavy doses of broad-spectrum chemical killers to eradicate weeds, there may also be more specific remedies for specific weeds that don't require dangerous chemicals. Plus, some weeds are remarkably resistant to herbicides, responding better to different methods of ...
